The Stellar Network

The Stellar Network

Basics of Blockchain Technology

Blockchain is a decentralized and distributed ledger system characterised by a chain of blocks, each housing a series of transactions. The integrity of this ledger is maintained through cryptographic principles, ensuring that once information is recorded in a block, it's resistant to being altered.

The distributed nature of the blockchain involves a network of computers, providing enhanced security and eliminating the need for a central control authority. This technology brings transparency and trust to digital transactions, adopting a strong safe tamperproof system.

Navigating Stellar Consensus Protocol

Stellar Consensus Protocol (SCP) serves as the consensus algorithm underlying the Stellar network, facilitating agreement among network nodes. This protocol prioritizes both safety and liveness, maintaining the integrity and functionality of the network through robust communication and agreement mechanisms.

In simpler terms, you could think of Stellar Consensus Protocol (SCP) as a traffic director for transactions in the Stellar network. It guides the computers, ensuring they all agree on the order of transactions. It's the system that keeps things organized, making transactions secure and keeping the network efficient.

The Stellar Network

Stellar Network for Asset Tokenization

Companies and individuals use the Stellar network for tokenizing assets due to its efficiency, low transaction costs, and scalability. Asset tokenization on Stellar involves representing real-world assets, like stocks or real estate, technology, precious metals etc as digital tokens on the blockchain.

Companies benefit from increased liquidity, reduced transfer costs, and access to a wider global market. Investors gain fractional ownership opportunities, increased market accessibility, and efficient near instant cross-border transactions. The Stellar network's streamlined tokenization process positions it strongly as a preferred choice for the future of bridging traditional assets to the blockchain space.

Lobstr Wallet

Lobstr Wallet

Installing Lobstr Wallet

Click on either of the links below and follow the prompts:

Creating Lobstr Wallet

Lobstr is a non-custodial wallet that allows buying, selling, receiving, sending, trading, and swapping assets that can be found on the Stellar blockchain. These steps will guide how to set up your wallet.

1. Click on Get Started/Create account. Enter email address. Your email will be used to verify IP address. Create a secure password and re-enter to confirm. Write down your password and store someplace safe. **DO NOT** screenshot because hackers can gain access to it. Tap on Create Account when ready.
2. Go into your email and open the email from Lobstr. Click Verify email. Check spam folder if this email isn't easily found.
3. Log into your Lobstr account and complete CAPTCHA. Click on Create Stellar Wallet.
4. Backup your account. Lobstr will auto-generate 12 recovery words. Tap continue and verify these words in the exact order given. Tap continue when finished. These words will be shown **ONE TIME**. Write them down in the correct order they are shown and store some place safe.

Lobstr Wallet

Lobstr Settings

Lobstr wallet requires KYC (Know Your Customer) protocol. These steps will guide how to set up your profile to activate your wallet and to receive funds.

Profile

1. Go to Lobstr homepage and select settings. Tap on profile.
2. Lobstr account will be email address associated with your wallet.
3. Fill in Name and Phone number boxes.
4. Make preferred selections for Currency and Language boxes.

Wallet

1. Go to Lobstr homepage and select settings. Tap on wallet.
2. Stellar account is your stellar address. This is your public address that is used for sending and receiving digital assets.
3. Federation address is the name you create for your wallet. Because this is public, do not include private information.
4. Secret key is a 56-digit alphanumeric key that proves you own your stellar account and gives full access to your funds. This key should NEVER be shared or stored digitally. Write down your key and store in a safe place.
5. Recovery phrase is the 12 words shown when setting up your wallet. Enter your 12 words to connect them to your wallet.

Lobstr Wallet

Security

1. Go to Lobstr homepage and select settings. Tap on Security.
2. PIN code & Touch ID offers extra layers of protection for your wallet.
3. Two-factor authentication(2FA) is designed to protect your wallet. Following steps show how to enable this feature.
 - Click on Get Started
 - Write down and store your 16 symbol backup key. Press on key to copy and tap continue.
 - Read through information on screen and tap continue.
 - Download and install an authenticator app from either App Store or Google Play Store.
 - Copy the one-time password shown.
 - Go back to Lobstr's 2FA screen. Fill in Lobstr account password, 2FA back up key, and one-time password. Click on enable 2FA.

Access History

1. Go to Lobstr homepage and select settings. Tap on Access History.
2. Shows latest account activity. A useful tool to see if there has been any unauthorized logins on your wallet.

Lobstr Wallet

Multisig

This feature is used to install Lobstr vault. Due to the high risk of scammers using vault to gain access as an account signer on your wallet, we do NOT recommend installing this feature.

Help

1. Go to Lobstr homepage and select settings. Tap on Help.
2. Help center offers a knowledge base of FAQ. Use the search bar to get started.
3. Contact support is for any issues and concerns you have with your wallet. Submit a ticket with your inquiry.

Lobstr Wallet

How to Sort Assets in Your Wallet

1. Go to Lobstr's homepage and tap on three lines with down-pointing arrow to the far right of My assets.
2. Lobstr automatically sets option as Default. View other available options and select your preference and tap save when ready.

Wallet Information

- Go to lobstr home screen and tap on XLM trustline.
- Scroll down to Reserved balance and tap on arrow at the far right.
- Balance Status screen will show the number of trustlines, active orders, XLM reserved, and available XLM balance.

Lobstr Wallet

How to do a Trade Order (Sell)

Lobstr's Trade feature allows for buying and selling assets. These steps will show you how to SELL an asset using Lobstr mobile device version. XLM will be used as an example of how to do this transaction.

1. Tap on the Trade feature in the side menu on Lobstr's homepage. This will bring up a trading pair of XLM(Lumens) and USD Coin. Tap on the option Trade Custom Pair. You can now select the asset you wish to sell. Select XLM in the box to the left and the asset you wish to buy in the box to the right. You will need to add the trustline of the asset you wish to buy if it is not currently in your wallet.
2. Select Sell and it will bring you to a screen where you can set your order. Choose Limit (you set your custom price) or Market (automatically the current market price and an additional fee included).
3. Fill in the amount of XLM you wish to sell. Check over your sell order and tap the green Sell XLM button when ready.

Note: If you already have the asset you wish to buy/sell in your wallet, a shortcut step is to go to the asset's trustline and tap on the Trade option. This will bring you to the Trade screen where you can fill out your order.

Lobstr Wallet

How to do a Trade Order (Buy)

Lobstr's Trade feature allows for buying and selling assets. These steps will show how to BUY an asset using Lobstr mobile device version. XLM will be used as an example of how to do this transaction.

1. You will first need to add the trustline of the asset you wish to purchase if it is not currently in your wallet.
2. Tap on the Trade feature in the side menu on Lobstr's homepage. This will bring up a trading pair of XLM (Lumens) and USD Coin. Tap on the option Trade Custom Pair. You can now select the asset you wish to buy in the box to the left and XLM in the box to the right.
3. Select the green Buy button and it will bring you to a screen where you can set your order. Choose Limit (you set your custom price) or Market (automatically the current market price and an additional fee included in the price).
4. Fill in the amount of the asset you wish to buy. Check over your buy order and tap on the green Buy button when ready.

Note: If you already have the asset you wish to buy/sell in your wallet, a shortcut step is to go to the asset's trustline and tap on the Trade option. This will bring you to the Trade screen where you can fill out your order.

Lobstr Wallet

Stellar Secret Key

The secret key represents private information and is used to encrypt data and sign transactions on the Stellar Network.

It proves that you own your stellar account and gives full access to your funds.

Secret key should **NEVER** be shared with anyone or entered on a website that is not recommended by Stellar.

NEVER screenshot or store your secret key on your phone or computer. Write it down and keep in a safe place.

IMPORTANT

BUYING XLM

Lobstr Wallet

How to Use Moneygram to Buy XLM

MoneyGram is a USDC deposit option that charges no fees. If you are in another country your money will need to be converted to USDC first.

1. Go to Lobstr's main page and tap on Deposit. Select Buy & Exchange.
2. Select Cash in with MoneyGram. Read through info and tap continue when ready.
3. Select your cash-in country and amount of USDC to deposit. Tap next when ready.
4. Search for nearest payment location and select one.
5. Read through the transaction details and click confirm when ready.
6. Confirm at the location their MoneyGram interface is working.
7. Fill in personal information and tap next when ready. Your name and date of birth must match your ID that you will present.
8. Select ID type and fill in all information. Click next.
9. Review transaction summary and click submit when ready.
10. Next screen will show thank you message. Click on ok.
11. Go to the register and tell the cashier you would like to complete a MoneyGram transaction. Provide ID and reference number for their verification process.
12. Tap OK on pin pad to confirm transaction. Hand the employee the cash you are depositing and collect your receipt.
13. Go to Lobstr's home page and tap on transactions. Verify that USDC deposited into your wallet. You can now swap or trade USDC for XLM.

Lobstr Wallet

How to Use Coinflip ATM to Buy XLM

CoinFlip ATM are CASH ONLY

1. Do a search in your browser for a Coinflip ATM near you.
2. Select XLM as the digital asset you are purchasing. There will be a \$2.49 flat fee included.
3. Read thru the terms and tap on I agree when ready.
4. Select how much XLM you would like to purchase; either up to \$900 or more than \$900 (ID will be required for this option).
5. Enter your phone number to receive one-time SMS passcode.
6. Enter the 5 digit code and click on to continue.
7. Read thru required disclosures and click continue when ready.
8. Enter payment tag. This can be any number you like and tap when ready.
9. Verify your tag number and tap confirm.
10. Go to Lobstr's homepage and select receive to find your stellar address QR code. Scan your stellar wallet address face down on the scanner.
11. Insert cash to purchase XLM. Next screen shows amount of XLM tokens you will be receiving. Tap on buy when ready.
12. Next screen shows transaction details and a receipt will be sent to your phone.
13. Go to Lobstr's homepage and tap Transactions. Select Received to view XLM deposited into your wallet.

Lobstr Wallet

Contact Coinflip ATM support if there is a delay and they will verify details of your transaction.

Fees Associated with Coinflip ATM

1. There is a 15.99% transaction fee for purchasing XLM. This fee is added to the market price.
2. There is also a flat fee of \$2.49. This fee covers the cost the blockchain charges for processing the transaction.

StellarExpert

StellarExpert Explorer – block explorer and analytics platform for Stellar Network.

These steps will help you begin to navigate how to use StellarExpert.

How to Use For Your Own Wallet

1. Type StellarExpert in your browser. Select the StellarExpert icon.
2. Tap on the search bar on the top right corner.
3. Copy your stellar address from your Lobstr wallet and paste in the search bar. Tap enter to view your account.
4. You will be able to view a summary of your account. Important to note Account Signers information. Your stellar address will be shown here. If other stellar addresses are also listed, verify them to ensure no scammers have gained access to your account.
5. Account Balances will list all the assets in your wallet.
6. Pending Claimable Balances will show the transactions listed under pending in your Lobstr wallet.
7. Scroll down to History/Trades/Active Offers. Tap on each feature to view activity in your wallet.

Lobstr Wallet

How to Use For An Asset

1. Go in your Lobstr wallet and select the asset you want to view.
2. Scroll down to View on Network Explorer. Tap on it.
3. StellarExpert will now highlight details of the asset.
4. Select the options shown to view more in-depth information.

Lobstr Wallet

How to Set a Trade Order For Maximum Token Limit

When assets have an ICO listed at a very low price, buyers can max out their token count by setting a specific trade order. The maximum amount of tokens that 1 XLM can buy is 2,147, 483,390.

The maximum number of tokens that an asset can hold is 922,337,203,685.4775807. The following steps will help guide how to place this trade order.

1. Verify the ICO of the asset you would like to add and establish a trustline for it.
2. Once asset is added to your wallet, select trade option.
3. Tap on the arrows to bring XLM to the box on the left and the asset to the box on the right. Select Sell option to sell XLM for the asset.
4. Trade screen will be shown. Select Limit.
5. Select the number of XLM you would like to sell. To achieve the maximum number of tokens you will need to sell 429.5 XLM.
6. Type in 2,147,483,390 in the next field to indicate how many tokens you wish to buy per xlm.
7. Verify the number of tokens you will be buying in the next field. Tap on Sell XLM when ready.
8. If your order does not fill or only fills partially, you can view your transaction under My Orders screen and it will be shown in Active Orders.

Lobstr Wallet

How to View My Orders

The following steps will help guide on how to view your Active Orders and Trade History.

Lobstr Wallet

1. Go to Lobstr's home screen and select Trade.
2. Tap on Trade Custom Pair shown at the bottom of the screen.
3. Trade screen will show a counterclockwise icon on the top right corner. Tap on that icon.
4. My Orders screen will show Active Orders and Trade History.
5. Active orders show orders that are waiting to fill. These orders will show the buy amount, price per token, price per XLM, and how many XLM
6. you are selling.

Stellar Expert

1. Type StellarExpert in your browser. Select the StellarExpert icon.
2. Tap on the search bar on the top right corner.
3. Copy your stellar address from your Lobstr wallet and paste in the search bar. Tap enter to view your account.
4. Scroll down to History/Trades/Active Offers.
5. Tap on each feature to view your transaction history and active orders.

Lobstr Wallet

How to Edit or Cancel an Order

The following steps will help guide on how to edit or cancel an order that is listed under Active Orders within your Lobstr wallet.

1. Go to Lobstr home screen and select Trade.
2. Tap on Trade Custom Pair shown at the bottom of the screen.
3. Trade screen will show a counterclockwise icon on the top right corner. Tap on that icon.
4. My Orders screen will show Active Orders and Trade History.
5. Active orders show orders that are waiting to fill. Scroll down to bottom of screen if you would like to edit or cancel your order.
6. Edit Order gives the ability to make adjustments to your active order. If any changes are done, tap on Update Order to create a new buy order.
7. To cancel an order select Cancel Order and your order will now be deleted.
8. Any XLM used for this order will now be deposited back into your XLM trustline.
9. The trustline for this asset will still be listed under My assets in your Lobstr wallet.
10. Scroll down to find the asset and tap on it. Remove Asset is shown at the bottom of the screen. Tap on that and trustline will be removed and 0.5 XLM that held the trustline open will now be deposited back into your XLM balance.

Lobstr Wallet

How to Remove Tokens From Your Wallet

Using Swap Option

1. Go to Lobstr home screen and select Home option. Tap on the asset you would like to remove.
2. Select the swap option. Next screen will auto generate selling the asset for XLM.
3. Tap on the entire number of tokens shown in blue. Verify the amount of XLM you will be buying. Tap on the green swap button at the bottom and screen will show success if your transaction is completed.
4. Asset will now show you have a zero available balance. Select Remove Asset and trustline will be removed from your wallet. 0.5 XLM will be

Return to Issuing Address

1. Go to Lobstr home screen and select Home option. Tap on the asset you would like to remove.
2. Scroll down to Issuer address and tap on to copy. Select Send option.
3. Select Stellar wallet and paste from clipboard the issuing wallet address. Verify and select continue when ready.

5. Review payment screen will show number of tokens being sent. Memo field is not required to be filled out. Tap send when ready.
6. Asset will now show you have a zero available balance. Select Remove

Lobstr Wallet

Donating Your Token

1. Go to Lobstr home screen and select Home option. Tap on the asset you would like to remove.
2. Select Send option.
3. Select Stellar wallet. Copy and paste donate*lobstr.co in the Enter Stellar address box. Tap continue when ready.
4. Select send max for the number of tokens you wish to send. Select continue when ready.
5. If Lobstr's donate wallet does not have a trustline established for the asset you are sending, your transaction will be a sent as a pending payment. This is only available in the mobile app.
6. When Lobstr's donate wallet claims your tokens sent, your asset will now show a zero balance. Select Remove asset and trustline will be removed from your wallet. 0.5 XLM will be deposited back into your XLM balance.

Lobstr Wallet

How to Add Multiple Accounts to an Existing Wallet (Mobile Device Version)

The following steps will help guide on how to add a new wallet to an existing one. You will need your 12-24 Recovery Phrase to be able to perform this feature. added back to your XLM balance.

1. Go to Lobstr homescreen and select Settings option. Tap on Wallets.
2. Select Manage Stellar wallets.
3. Your existing wallet will be listed underneath Manage Wallets. Tap on Add New Wallet at the bottom of the screen.
4. Your Recovery Phrase for your Lobstr wallet is required to create and manage multiple accounts that will now be connected. Tap on Connect Recovery Phrase when ready.
5. Lobstr safely stores your Recovery Phrase when you connect it to another wallet. Transactions will be made under one Lobstr account. All wallets connected will all share the same Recovery Phrase. Tap on Continue when ready.
6. Enter Recovery Phrase in the exact order it was shown when you created your wallet. Tap on Connect Recovery Phrase when ready.
7. A new wallet will now be listed under your original one. Tap on the three dots to the far right of your newly created wallet. Review features shown and set federation address for your new wallet.
8. To select the wallet you would like to use, tap on the three dots associated with that wallet. Select switch to this wallet. The word active will now be highlighted next to the wallet that will now be ready to use.
9. It is important to note that each wallet will have its own QR code and Secret Key. The 12 Recovery Phrase from your original wallet will now be associated with all wallets now connected.

Lobstr Wallet

The Fine Art of The HODL

When we take the step of putting our hard earned cash into the volatile landscape of asset investment, its extremely important to master the fine art of the HODL (Hold On for Dear Life).

This becomes particularly significant when waiting for Liquidity.

Embracing the art of the HODL mentally can be a challenge, especially if you are new and see a dip in value after you purchase an ICO, however its important to recognise this point.

Fluctuations in prices can often stem from price suppression. This happens when the market lacks Liquidity. This is indicated by peaks and dips that are exaggerated. This suppression happens to deter dumping of assets with no sufficient liquidity yet.

We cannot stress enough the importance of the HODL to benefit from maximum gains long term.

The word "HODL!" is rendered in large, bold, 3D red letters with a slight shadow underneath, set against a white background.

Lobstr Wallet

How to Use the Orderbook

The following steps will help guide on how to read information shown on orderbook. Orderbook is a useful tool to place buy and sell orders. Guardian will be used in the example.

Mobile Device Version

1. Go to Lobstr homescreen and tap on Home.
2. Under My assets locate and tap on Guardian.
3. Tap on Trade Guardian. You will now be brought to the Trade screen.
4. Trade screen gives options of Overview, Orderbook, and Last Trades. Tap on Orderbook.
5. Orderbook highlights Amount(Guardian), Price(XLM), and Total(XLM). Notice the Buy button is highlighted at the bottom.
6. To set a BUY order: Tap on the price(XLM) shown in red that you wish to pay. Take note of the number of tokens available for that price. You will now be brought to the screen where you can place your order.
7. Fill in the Amount of Guardian you wish to buy. That number will auto generate the Total number of XLM that will be used to buy Guardian. When ready tap on Buy Guardian.

Lobstr Wallet

* It is important to note that if the number of Guardian you wish to buy exceeds the amount available at the price point set, the unfilled amount will sit in Active Orders. This order will be filled when the price per XLM dips down to match price set or when someone sets a sell order that aligns with buy order XLM price.

8. To set a SELL order:

At the bottom of the screen tap on Sell. You will now be brought to the screen where you can place your order.

9. Fill in the amount of tokens you wish to sell and the price of XLM you would like to set your sell order at. This will autogenerate the Total XLM field. When ready tap on Sell Guardian.

10. Your order will now sit waiting for a buyer.

SDEX

How to Use SDEX

Stellar Decentralized Exchange Assets is a platform where users with a compatible non-custodial wallet can search and trade their digital assets that are listed on the blockchain via smart contracts. These steps will help guide how to use the SDEX.

How to do a Search for an Asset

1. Type SDEX in your browser. Select the SDEX explorer icon.
2. SDEX does not require users to register an account. Tap on the search bar in the top right corner.
3. There are three options to search for an asset.
 - Asset Code is the name of the asset. Using this option is not always reliable due to many copycat tokens created by scammers.
 - Asset Issuer is the public key of the issuing account. Scammers have tried to mimic authentic keys by duplicating the first and last four numbers in the address. We recommend searching WhipLash347 Telegram for assets and copy issuing address directly from his channel. Paste entire key in search bar and valid asset will be shown.
 - Home domain is a name given that hosts the stellar.toml of the asset. Scammers use misspelled domain names to mimic authentic ones. Always verify asset's information by checking on WhipLash347 Telegram.

SDEX

How to Add an Asset to a Wallet

With Trade Option

1. Once asset is verified authentic, tap on asset name.
2. Tap on the Trade button.
3. Pop up screen highlights three wallets. Select Lobstr.
4. Sign into Lobstr account and follow steps for trade transaction.

Without Trade Option

1. Create your own link.
2. Follow the formula for work around.
3. <https://lobstr.co/trade/asset code:correct issuing wallet>.

SDEX

What is SDEX Exporer and How to Use it

If you search lobstr & the correct token does not appear (because it's flagged as fraud - it isn't)

1. Sign on to sdexexplorer.com
2. Tap in the Search area
3. Enter the Home Domain (in this instance, but you can also enter the Asset Code or Asset Issuer to do a search)
4. Tap on ASSET YOU WANT
5. Tap on Trade to add it to your Lobstr wallet
6. Tap on Lobstr
7. Tap on the double lines between ASSET and Lumens
8. Scroll down
9. Click on Sell
10. Enter the Amount of xlm you want to invest
11. Click on Sell XLM
12. The asset is now in your Lobstr wallet

SDEX

What to do When SDEX Does Not Pull up the Asset you are Looking For

For those needing help with how to “work around” assets that have been flagged in sdex and no longer have a “trade” button to push, create your own link for the asset using the formula below.

<https://lobstr.co/trade/native/GBRIDGE:GDM7I5J7R7ASIUQ74MYOHD6BX5N7WKJ7AFG7HOVR7YEUPD3QETA5S347>

As long as you have the correct asset name/abbreviation AND the correct issuer address, you're GOLDEN! Takes you directly to that asset on lobstr.

Workaround for trading an asset

1. Open a trade screen in LOBSTR web browser
2. Copy paste from your sdex or stellar expert taskbar to your LOBSTR taskbar as per the formula. Change the hyphen (-) to a colon (:)

Workaround formula

`lobstr.co/trade/ASSET:ISSUER ADDRESS`

Tips & Tricks

Tips & Tricks

Lobstr ID Verification Email Not Received

- Latest lobstr update done?
- Spam folder email account checked?
- Save Lobstr as contact in email
- Try login via phone device on Lobstr Web (where yr App is too)
- Also don't use VPN nor public wifi

Not Sure if Cash Back Received?

- Go to Lobstr "Transactions"
- Open "Received"
- Scroll for related asset...
- Make also sure
 - 1) you did buy at ICO and
 - 2) you still have it

Tips & Tricks

WARNING!

Always double check QR codes or domains (lists) posted by members in chat.

Copy at your own risk

Investing responsibility

Financial investment is always the responsibility of the investor

Missing Cash Back?

Make sure to follow all company channels, watch out for announcements

When announced, give it some more hours to receive it, before asking

Only after that, ask for Dev in charge

We will ask you to send a dm with transaction proof to related Dev @...

Re: missing asset, proof + your wallet

Tips & Tricks

Trade: Sell XLM instead of Buy Asset (Used to buy maxed out amount at 2,147 billions)

You have the asset trustline?

You go to trade

Then you exchange the assets so that xlm is on the left

Then you press sell to open menu

3 fields

1= amount of asset

2= price.. fill in the 2,147 billions

3= put how much xlm you like to spend

Press sell

Buy in the Dips

Asset-backed digital currencies, including ICOs, experience dips and peaks. Buying the dips can be a strategic move for potential long-term gains. Stay informed, seize opportunities during market downturns, invest wisely on this investment journey - buy in the dips.

History of the Financial World

History of the Financial World

If you want to understand the needed and anticipated changes in the financial world, a certain level of knowledge and historical background is needed.

The digital asset-backed currency system we are moving into is the bridge to financial freedom and independence.

The innate human rights and power that we lost along with our wealth and assets.

History takes us all the way back to the kingdom of Juda and the Talmud. In the Roman era it was known as Judea. Their Babylonian Talmud was a twist that falsely justified what we now know as fractional reserve banking - aka lending with high interest rates, usury and debt enslavement.

When you hear the word "Talmud" in the context of financial history, it is wise to assume we are referencing the Babylonian Talmud and not the Jerusalem Talmud (the original Talmud). This Babylonian Talmud is twisted to falsely justify war and usury and is a product of the Khazars. The imposter Jews/ewes. The wolves in sheep's clothing.

This is where the Red Shields-Rothschilds come into the picture.

The Rothschilds stemmed from the Khazars, known for their reserve banking (money changers).

They are also referred to as the Reptilian bloodline in human form, the 1%, the Hybrid Ruling Elite. They are technically the "Homo Capensis", the elongated skull hominidae, the ConeHead ones.

Those who have been hidden amongst the "Homo Sapiens", the RH negative bloodtype beings who have controlled humanity since thousands of years occupying positions of power, through collaboration with the Vatican using religion, wars and the banking system to create bonds, debt and to take over and control wealth.

They are the ones who created poverty, separation, division and invested in poisoning of our food, air and water. As the Rothschild,s own many companies, universities and utilities.

History of the Financial World

The Rothschild bloodline set up different family members in different countries who spread their banking corporation. The big bait and switch was the fact that you could get a receipt for your gold and exchange it in another country with one of their banks so you wouldn't risk somehow losing it or getting robbed during travel. Their goal was to obtain all of the life force giving gold on planet Earth. The Earth's most potent asset that is highest in value because of frequency, Alchemy and heightened life giving nature, longevity and altered powers in consciousness aka Manna.

A world-wide dominated jurisdiction was created by the Vatican under Unam Sanctam.

Unam Sanctam (papal bull) means "one sanctuary" or "One church."

Ruled by religion (Vatican) and effected by government (Washington) and owned by the Rothschild bankers (London).

Through the relinquishment of the right to exist and through the acceptance of name in capital letters in birth certificate under Maritime law; Unam Sanctum, man kind willingly but unknowingly accepts the loss of it's divine essence, rights and bonds to Maritime Law instead of Common Law.

We still live under the Maritime Law worldwide today.

This is our legal and tax system we were all born into and have grow up to accept as normal.

We pay taxes and are bonded as stock on the market from the day we are born until the day we die because of this bull.

This has been the entry into a corrupt Roman papacy that would spread trauma through bonds, taxes, debts, war and crime over centuries.

History of the Financial World

They came to own human beings by owning and creating their idea of what wealth is. From convenient wealth transportation to full on world wide debt slavery under one world reserve currency (the petrol dollar) and one church/Unam Sanctam/United Nations.

The Rothschilds played their roll in the invention of the Bavarian Illuminati, which Albert Pike would later call to merge with freemasonry in a way that disgraced both the art of masonry and illumination/illuminati. He then drafted up a plan for the "New World Order" involving 3 world wars that would bring their idea of order and world domination out of everyone else's experience of chaos and loss.

This loss has come to an end.

BRICS /ISO20022 / Basel 3 is the basic structure of this bridge to our freedom.

BRICS represents a departure from traditional fiat currencies and systems.

Unlike fiat currencies, which derive their value from government declarations, a BRICS gold-backed currency draws its value from an underlying precious metal-gold. The most important and misunderstood life giving metal on the planet.

When all great powers of the world decide to no longer be ruled by the old guard and stand together we should be celebrating as this is the beginning of the new, and a huge step closer to freedom,

At this point in time Foreign Central Bank and Sovereign wealth funds are buying Gold.

History of the Financial World

It is not to fortify their currencies.

It is not to defend in price inflation.

It is to seize and transition assets away from the SWIFT petrol dollar system as the monetary basis and trade payment.

BRICS is accumulating Central Bank

Gold back for the distribution and wealth accumulation for the people.

To rebuild this world with gold backed assets to trade and create with

To open a new era.

The Golden era.

"The End of Poverty, The End of Debt, The Beginning of a New Golden Age!" No Poverty, No Hunger, No Debt, Only Global Prosperity and Peace for ALL!

The new financial system is part of GESARA law.

The IMF will announce the "global gold-standard monetary system" once GESARA is announced. All remaining fiat currencies will be cashed in for gold-standard currency and reevaluated (RV) as so.

Paper money will eventually be phased out and all currencies will be digital and brought under the new financial Stellar and Ripple system.

To our mentor, Whiplash347.

Your guidance and support has been invaluable to us over the past several years. Thank you for always being there when we have needed you. Thank you for your wisdom, your wit, and your perseverance and drive to keeping us on the path toward our new future. You, Whiplash347, have shown us that magic indeed lives within each of us. Your steadfast honesty, integrity, loyalty, compassion and unconditional love is truly unmatched. Your vision and tenacity has inspired us to new heights. You truly are a beacon of strength, grace, and empowerment. It has been a great pleasure and honor to assist you as your Support Team.

Maryann, Tifanie, Kath, Danielle, Radio Babe, J R and LeGo
